where tracking meets success

Where tracking meets success

THE CHALLENGES OF WORKFLOW OPTIMIZATION ARE REAL. WE WORK RELENTLESSLY TO SOLVE CRITICAL WORKFLOW CHALLENGES BY LEVERAGING COMPREHENSIVE TRACK AND TRACE INNOVATIONS AND INSIGHTS THAT HELP YOU...

CONTINUOUSLY IMPROVE

REDUCE WASTE & ERRORS

INCREASE EFFICIENCY

BOOST PERFORMANCE

ELEVATE SECURITY

Ensure a lasting identity no matter your challenges

CRYOGENIC

HIGH HEAT

CHEMICALS

COLOR & SPECIAL IMAGING NEEDS

ABRASION

LONG-TERM STORAGE

Pre-printed barcodes

Vision system verified with sequence tracking to ensure no duplicates and high read rates designed with your workflow in mind.

Pre-barcode labware

Your labware, procured, custom-marked, prepared and packaged to your specifications. Eliminate the time consuming task of labeling from your lab and ensure compliance to your application.

Complete on-demand label printing systems

Printer evaluation and system setup to your specific materials, bar code verification and functionality requirements.

Automation

Automated and semi-automated label printing and application to labware and components to enhance work-flow, throughput speed, and label placement accuracy.

Software

Software tools that range from label format generation, design, management, bar code verification, and system integration to cloud-based track and trace ecosystems.

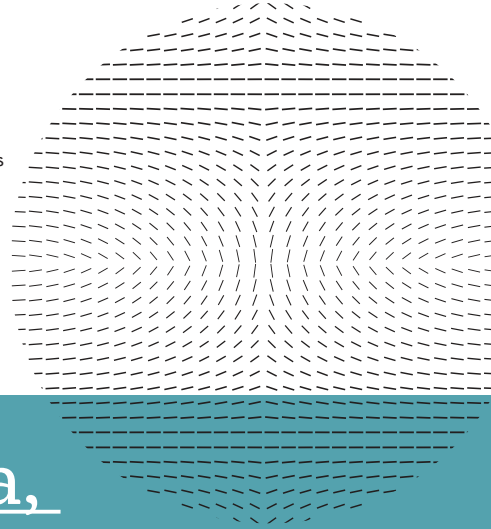

RFID

Our team can help determine if RFID can deliver better results and ROI than barcodes for your application, and tailor a complete system to your specific needs and environment.

Label Materials Resources

Expertise and engineering resources to support selection, design or troubleshooting of bar code and RFID label related issues for challenging environments like cryogenic storage, chemical exposure and overall workflow functionality.

Bio, Pharma, Research, Blood & more...

75% of the North American blood supply is tracked with Computype custom designed donation identification number sets

Over
175
million

Histology slide labels are bar coded annually in conjunction with automated diagnostic testing platforms

80% of big pharma and biopharma companies trust our labeling and outsourcing services to aid in their research and discoveries work.
