

# Labware Prep™ Express Service

CUSTOM PRE-BARCODED LABWARE WHEN YOU NEED IT

## Initial Set-up

Boost efficiency in your workflows, even when your data arrives on short notice with pre-barcode labware through our Labware Prep™ Express Service. We can accelerate your ordering process by learning a few things about your facility and processes.

### WHAT ARE YOUR DATA NEEDS?

We can print your variable and/or static data in a linear or 2d format (or both) on the sides, bottoms, and/or caps of vials, or plates on up to two sides. We're also able to include additional data and markings such as human readable information, color-coding, graduation lines, logos, fill lines and more.

When you're ready, we'll need to discuss your sequences so we can pick up exactly where you left off and maintain the integrity of your data.

### WHAT LABWARE ARE YOU USING?

We'll source and stock the plastic or glass labware of your choice and even help you find substitutes or equivalents if needed.

### HOW IS YOUR LABWARE USED?

With an understanding of the conditions and exposures your labware will undergo during processing, we can recommend the most suitable imaging method for your application. With options ranging from applied labels, cured ink printed directly on the labware, and extra durable laser or fused marking for items going into storage or subjected to chemical exposures.

\*Requires initial set-up period of approximately 2-3 weeks. 48-hour delivery requires placing order prior to 10:00 AM US Central Time Monday-Thursday and choosing early next day delivery (where available). Shipping timing is at customer's discretion. Minimum charges apply. Maximum order quantities apply based on imaging method. Ask your Computype representative for details.

## Labware Prep™ Express Service

Once the initial set-up is complete and we've sourced your labware, we'll be ready to take your orders and ship them to you the next day. You could then have up to 5,000 pieces of labware ready-to-use in as little as 48 hours.\*

With your information and materials on hand the process is simple:

1. Place your order
2. We prepare your order
3. Receive your labware in original labware manufacturer packaging
4. Repeat as needed

Computype is trusted by some of the world's most prominent life sciences companies and diagnostic labs to provide hundreds of thousands of pieces of pre-marked labware every year with linear and 2D codes using custom sequences and variable data.

We'll prepare your labware with the same reliable quality and accuracy enjoyed by the majority of the USA's blood banks who also trust Computype for identification products.

## FORMIDABLE LAB ENVIRONMENT, MEET FORMING A PARTNERSHIP THAT MAKES THE GRADE.

From printers to scanners to label replication systems, Computype can equip and provide solutions for you no matter the challenges of your lab environment. Over the past twenty years, we've put our labels and adhesives through endless tests to prove they can keep up with lab demands of your laboratory.

## WE'D LOVE TO HEAR FROM YOU.
